

COURSE COMMITMENT

Course Title: L3 Visual Effects & Animation
Your Course Leader: Nicky Martin

vJan24

Our commitment to you

We empower, develop, and support your creative journey. Through advanced workshops led by experienced tutors, we offer opportunities for growth in university and employment; propelling you to establish your presence within the vibrant creative industry.

Our education offer

Intent

Our aim is to delve into the diverse roles and responsibilities encompassed by the realm of VFX and Animation. Through this exploration, we seek to nurture individuals to not only excel creatively but also become respectful and contributing citizens. We emphasise the importance of embracing diversity and upholding protected characteristics as integral components of professional and personal growth.

Implementation

We facilitate this intent by integrating industry-relevant briefs into our curriculum, collaborating closely with contacts from the field. These briefs serve as the foundation for our students' creative endeavours, whilst aligning with specific learning objectives. This approach ensures that theoretical concepts are seamlessly intertwined with practical applications, preparing our students for the dynamic demands of the industry.

Impact

The impact of our approach is evidenced through substantial growth exhibited by our students. Students consistently exceed expectations, translating their acquired knowledge into tangible achievements such as the young creative awards which students take part in every year. This upward trajectory reflects in their academic and practical performance, as they attain improved grades. Furthermore, their bolstered confidence and heightened autonomy extend beyond the classroom, empowering them to excel both in their chosen vocation and in their broader academic pursuits.

Expected behaviours and attitudes

Intent

Our objective is to cultivate a culture of positive behaviours and attitudes, underpinned by values such as attendance, punctuality, and employability skills. By embedding these attributes, we aim to equip our students with the foundation necessary for prosperous and fulfilling professional journeys.

Implementation

We achieve this intention through the establishment of an inclusive classroom environment that prioritizes student comfort and participation. Through open discussions, students are encouraged to articulate their thoughts and ideas, fostering a sense of ownership over their learning experiences.

Impact

The impact of our approach is evident in the transformation of our students' attitudes and behaviours. By fostering an inclusive environment that values their voices, students develop a heightened sense of responsibility and engagement. This is reflected in their increased attendance and punctuality, key indicators of their commitment to their educational journey. Moreover, the cultivation of employability skills enhances their readiness for higher education or the professional world, positioning them favourably for successful careers.

Your personal and professional development

Intent

Our overarching intent is to foster well-rounded individuals, equipping them with qualities that extend beyond academics. We nurture self-awareness, resilience, social and personal responsibility, preparing students for the challenges of both professional and personal life, particularly within the Visual Effects and Animation sector.

Implementation

We cultivate a holistic learning environment, promoting self-reflection, interpersonal skills, and a strong community sense. Tailored activities and discussions guide students to recognize their strengths and areas for growth within the context of their future careers.

Impact

Our approach cultivates students' multifaceted growth, positioning them effectively for higher education and employment in the creative media field. Self-awareness equips students to align their aspirations with industry demands. Emphasis on interpersonal skills fosters collaboration, adaptability, and effective industry work like experience.

These experiences bolster resilience and readiness to thrive in both higher education as well as Creative media professions.
