

COURSE COMMITMENT

Course Title: L3 Games Art
Your Course Leader: Nikki Rynne

vJan24

Our commitment to you

Our mission is to develop industry specific skills and encourage self-expression, in a fun and creative environment.

Our education offer

Intent

We intend to embed key concepts into learner's long-term memory to help develop skills they can use fluently and consistently, while developing basic core skills.

Implementation

Our teachers have expert knowledge and skills to help learners develop industry focused skills and techniques as they progress into different employment opportunities, as well as the life skills they will need as they progress.

Impact

To create skilled individuals with the confidence and knowledge to push themselves further within education or employment, the pass rate for the year 22/23 on Games Art was 96%; demonstrating that learners long term memory was evident due to their success over the past year.

Expected behaviours and attitudes

Intent

To create professional individuals that can develop a strong attitude towards work, creating a solid work ethic that allows the students to become contributing citizens within the community.

Implementation

By challenging learners and stretching their routines, we set clear expectations for learners to focus on; while showing the respect and courtesy we require from our students.

Impact

Learners develop a professional attitude toward their work and their peers, creating a holistic environment for all to work within. Last year we had an average attendance of around 91%, which indicates the effect these routines are having on our students.

Your personal and professional development

Intent

Promoting an inclusive and creative environment that meets the needs of all learners and enables all learners the chance to gain an education.

Implementation

Encouraging growth through independent learning and developing a resilience for pressure by providing learners with the ability to manage a task and develop an open mind set. Using high quality creative spaces, with skilled tutors; learners are free to express themselves and develop both professional and personally.

Impact

Self-efficient learners with the confidence to embark into a new routine and further develop their skills and fundamentals, learners will have more understanding for how the world around them works and develop an understanding for how to progress on to new and exciting adventures. This year, 90% of our students felt confident enough to progress onto university.
