MEATY INTERMEDIATE
STEEL FENCE POST
NOW AVAILABLE

The Smarter Alternative to Timber Fence Posts

Constructed from high-tensile steel, the QuickClip™ Fencing System outperforms leading metal alternatives and offers guaranteed strength for decades, without the deterioration that affects timber posts.

QuickClip™ Intermediate Steel Fence Posts

Unrivalled Strength - Extruded 'Y' profile, high tensile steel and additional reinforced plate provide up to double the strength of typical market alternatives.

Long-Term Value - Maintenance free with a 40-year lifetime guarantee.

Consistent Performance - Unlike timber, QuickClip™ won't rot, split, or weaken in the ground.

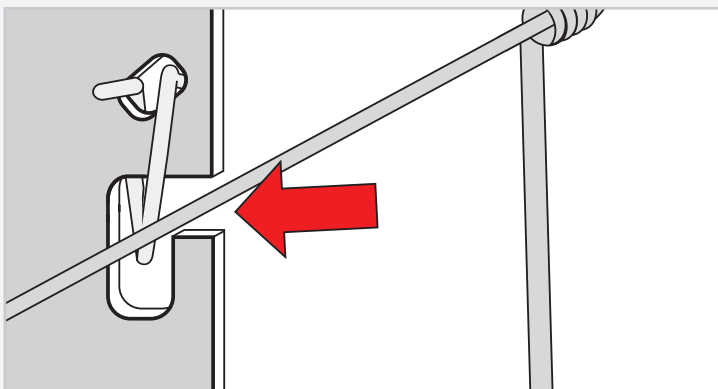

Grant Compliant - Fully compliant with government schemes.

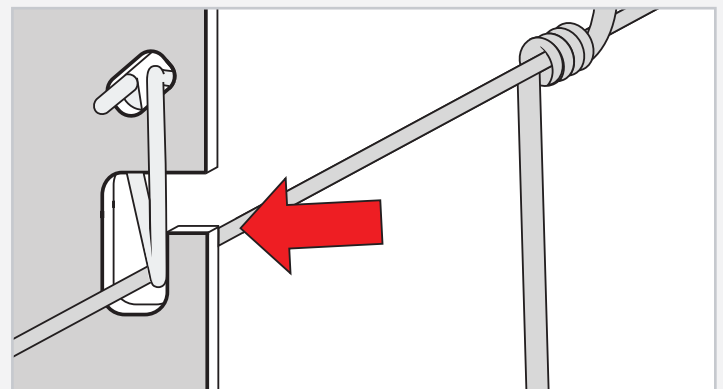

Fast & Easy Installation - Drive directly into the ground, no expensive machinery required.

QuickClip™ Wire Clipping System is a Perry Registered Design

Wire is clipped into place by hand, no tools required

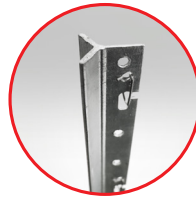

Wire remains securely in place behind the clip

QuickClip™ Classic & Meaty Intermediate Steel Fence Posts

No.2170-INTER-GV18

QuickClip™ **Classic**
Intermediate
Steel Fence Post

Extruded 'Y' Profile

QuickClip™ Intermediate Posts are extruded as opposed to welded for superior strength and durability

4mm Ø Holes

For electric wire insulators

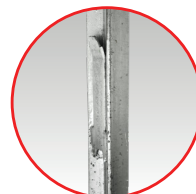

Grade A2 304 Stainless Steel Clip

Corrosion-resistant clips for effortless wire installation without extra tools or hardware

Reinforced Welded Plate

Strength tested to outperform the demands of modern agriculture

Anti Pull Out Plate

Ensures the post stays securely in place under high tension

Versatile Wire Spacing

Both the Classic and Meaty have the same wire spacing and are compatible with the most popular wire types.

Long Lasting Galvanised Finish
Corrosion-resistant coating giving a
40 year guarantee

No.2174-2000GV

QuickClip™ **Meaty**
Intermediate
Steel Fence Post

NEW

When to use a Meaty Post

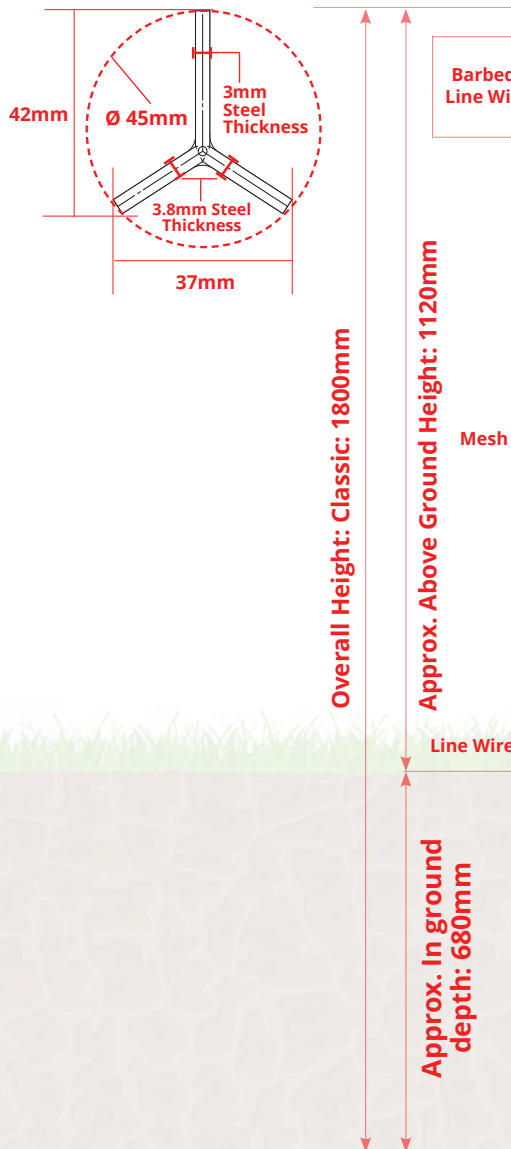

- For large cattle and heavy livestock
- Fence line deviations or uneven terrain
- Very soft ground conditions
- Where extra strength is needed

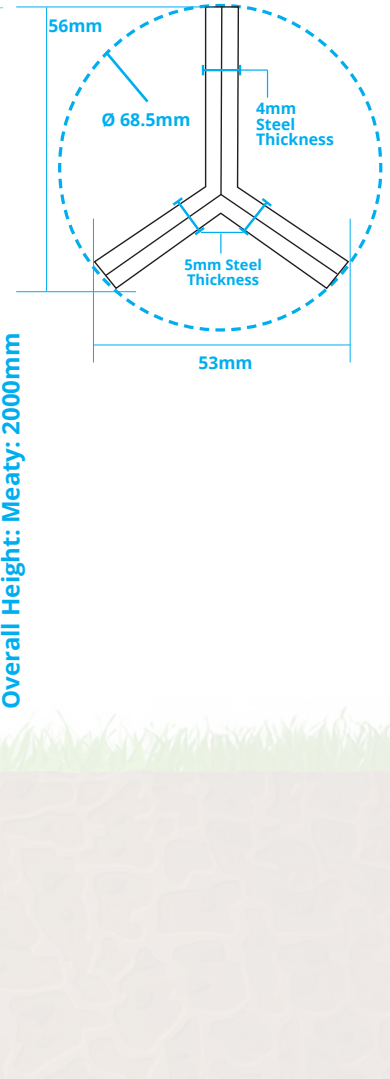

INTERMEDIATE POST TECHNICAL DATA

QuickClip™ **Classic** and **Meaty** Intermediate Posts have a versatile wire spacing making them suitable for many wire types. Posts include 2 spaces for barbed/line wire, a bottom clip for line wire and 13 holes for electric wire insulators.

Classic Post Full Specifications

Length	1800mm
Weight	3.60kg
In ground depth	680mm approx.
Profile	42mm x 37mm
Steel Thickness	3.8mm
Material	High Tensile Steel
Registered Clipping Mechanism	Grade A2 304 Stainless Steel
No. of clips	11
Finish	Hot Dipped Galvanised to a minimum 140 micron thickness

Meaty Post Full Specifications

Length	2000mm
Weight	7.30 kg
In ground depth	880mm approx.
Profile	56mm x 53mm
Steel Thickness	4 / 5mm
Material	High Tensile Steel
Registered Clipping Mechanism	Grade A2 304 Stainless Steel
No. of clips	11
Finish	Hot Dipped Galvanised to a minimum 140 micron thickness

QuickClip™

Heavy Duty Straining System

No.2170-STRAINSYSTEM

40 YEAR
GUARANTEE
Conditions apply

No.2170-STRAINSYSTEM

QuickClip™ Heavy Duty Straining System

Every secure and long-lasting fence starts and ends with a reliable straining system. The QuickClip™ Heavy Duty End Strainer has been engineered to deliver exceptional holding power and long-term performance, making it the foundation of long-lasting agricultural fencing.

Strength Where It Matters Most

Guaranteed Strength - Extra heavy-duty construction for maximum durability.

Consistent Performance - QuickClip™ provides a consistent anchor point throughout the fence's life, unlike timber strainers that often need replacing and require maintenance.

40 Year Guarantee - Hot dip galvanising to BS EN ISO 1461 for long-term corrosion resistance.

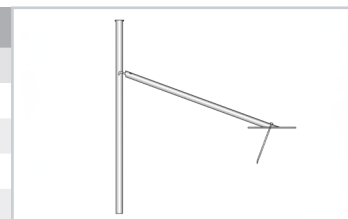

No Hazardous Treatments - Safe, non-toxic steel alternative to creosote, or chemically treated timber posts.

Suitable for All Ground Types - Additional plates can be affixed to the post for use in soft ground.

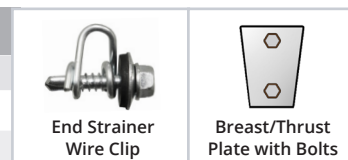

QuickClip™ Heavy Duty Straining System Includes:

Description	Code	Size	Qty
Straining Post	2170-POST	2400mm	1
Support Strut	2170-STRUT	2500mm	1
Pressure Base Plate	2170-BASE	250mm	1
Drive-in Security Pin	2170-PIN	760mm	1

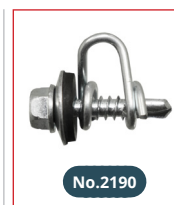

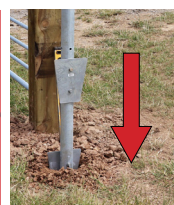

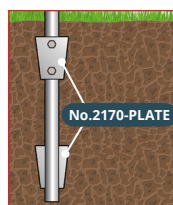

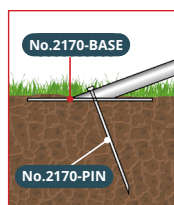

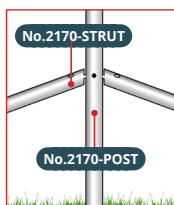

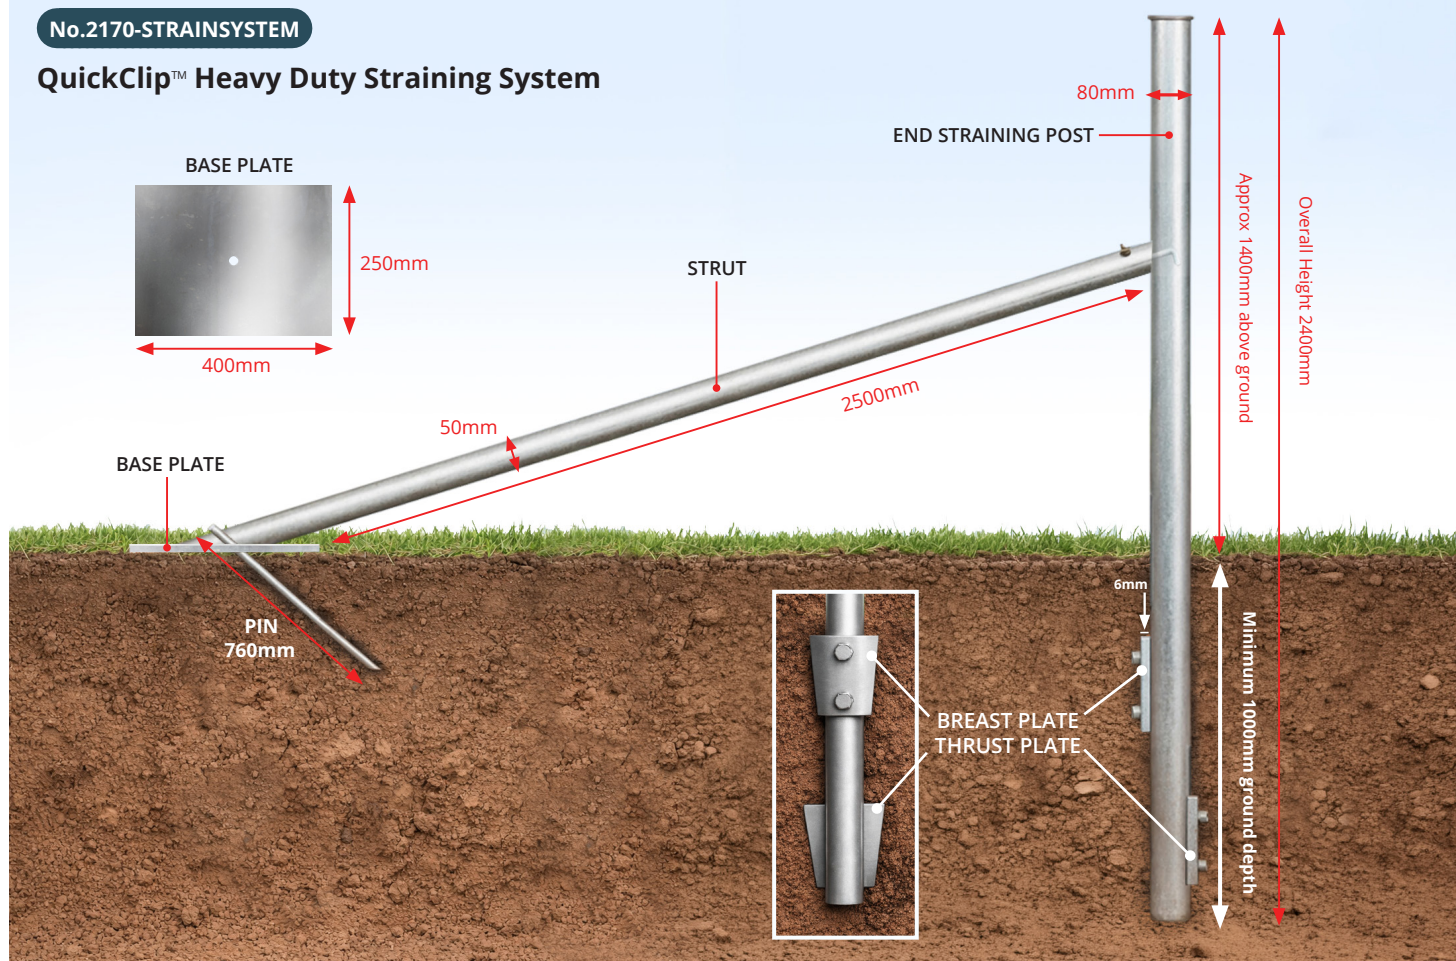

QuickClip™ Straining System Additional Components:

Description	Code	Size	Qty
End Strainer Wire Clip	2190-PP0000GV	31mm	50
Breast/Thrust Plate with Bolts	2170-PLATE	250mm x 200mm	1

No.2170-STRAINSYSTEM

QuickClip™ Heavy Duty Straining System

The Steel Support Struts slot into the pre-drilled holes of the **Post**, and allow for multiple strut positions, suitable for two-way and corner straining applications.

Steel Base Plates provide reliable ground support. The base plate with drive-in pin provides anchoring and stability in hard and soft ground.

Breast/Thrust Plates are available to order as additional components and are recommended for soft ground to stop the post from turning.

Strainer Wire Clip with Self Tapping Screw. Used to securely fasten wire to straining post. Simply screw directly into the steel, no pilot hole required.

No.2019M0000GN

Intermediate Petrol Post Driver

- Aluminium collar designed to specifically fit the QuickClip™ post profile
- Adaptors to suit up to 75mm diameter posts
- Adaptors also available for square posts

No.2019L0000GN

Strainer Petrol Post Driver

- Adaptors to suit up to 100mm diameter posts
- Adaptors also available for square posts

No.487

Manual Post Rammer

Heavy duty and smaller diameter double handed post rammer, designed for QuickClip™ Intermediate Fence Posts

Classic Intermediate Post Cap. Black
