

**SAFETY INFORMATION: (Please retain for future reference)**

- This product must be installed in accordance with the national building regulations, if in doubt consult a competent electrician.
- Always turn off the mains supply before commencing the installation of this fitting .
- This is a Class I product and requires an Earth connection – 230 (240) V – 50Hz AC.
- The Product should not be modified , as this may void the product warranty and render the product unsafe.
- We recommend the use of a suitable RCD , capable of carrying the intended load and which is correctly fused.
- Before inserting and replacing a lamp make sure that the power is switched off and the bulb has cooled down. Do not exceed the maximum stated wattage.
- Never leave packaging components within reach of children as they can be a source of danger.

POSITION:

- The fitting is IP44 rated and suitable for installation in outdoor locations. We would recommend the light fitting is installed undercover .
- The fitting is NOT suitable for installation in Marine locations.
- The fitting is suitable for fixing onto a flat , solid surface.
- Ensure sufficient access to the fitting to enable safe maintenance.

LAMP INFORMATION:

- We recommend LED lamps only.
- The fitting can be dimmed when using an incandescent lamp .
- Do not exceed the maximum wattage and bulb type stated on the lamp holder.

AFTERCARE AND MAINTENANCE:

- Always disconnect power supply when servicing or cleaning.
- Clean only with a dry or slightly damp cloth
- Do not use abrasive cloths or cleaners as this may damage the product.

MAINS SUPPLY

LIVE - Possible colours : Red or Brown
 EARTH - Un sleeved copper or (Green / Yellow)
 NEUTRAL - Possible colours : Black or Blue

OUTDOOR LUMINARIES

Stainless steel/aluminium enjoys a strong and enduring reputation for long term appearance and structural integrity. But like all materials they may become stained or discoloured over time, impairing the overall look. This brown discoloration is referred to as “tea staining”. Tea staining can be defined as: Discoloration of the surface of stainless steel/aluminium that does not affect the structural integrity or the longevity of the material.

CONTRIBUTING FACTORS:

The relationships between the contributing factors are complex, but generally become increasingly critical closer to marine environments.

ENVIRONMENTAL FACTORS:

Tea staining occurs most commonly within 5 miles of the sea and becomes progressively worse closer to the marine source. However, wind exposure, pollution levels and higher temperatures can create environments where tea staining may occur outside the 5 mile limit. Therefore we recommend not to place this product within 5 miles of the sea/estuary.

MAINTENANCE:

As with most outdoor products occasional maintenance is required to ensure protection from the elements. We would advise that fine grade oil (Such as ‘Baby Oil’ or WD40) is rubbed into the metal sections of the product. Regular treatment should aid the life and appearance of the product.

GUARANTEE:

We will not assume responsibility for corrosion or any other resulting damage to our products where they are installed in areas in which fertilizers or salt are present, either in the air or in the soil, or where our products are installed near to chemical plants etc. with emissions of heavily polluted air.
