GLOSSARY OF SEWING METHODS

Sewing methods shown in *ITALICS* are defined below:

CLIP CURVES- to make seams lie flat.
Inner Curve - Make little clips, or snips, in the seam allowance just to, but not through, the stitching.
Outer Curve - Cut little wedge-shaped notches from seam allowance.

DART SEAM- To stitch dart seam, with RIGHT sides together, bring broken lines together carefully matching small dots. On INSIDE, place pins at RIGHT angles to the broken lines. Stitch the dart seam from outer edge to the point.

Press the dart seam flat along the stitching to "blend" the stitches, then press dart as indicated in the Sewing Directions.

LADDER STITCH - Using a strong thread, take a small stitch in one edge close to seam. Then take a small stitch in the other edge close to seam. Pull up thread after each stitch to bring edges together. Continue to alternate from edge to edge with the smallest hand-stitches possible. Knot thread securely at end of stitching.

OUTLINE STITCH - For outline stitching, work with as many threads as desired and use a large eyed needle. Bring thread to RIGHT side at A, down at B, up at C, etc. Always hold thread in the same position either all above or all below the needle for an even line.

PREPARE APPLIQUE - Apply paper backed fusible web to WRONG side of applique fabric, following manufacturer's directions. Pin pattern to RIGHT side of prepared fabric. Cut out each applique. Transfer markings to RIGHT side of applique using a washable fabric marking pen or pencil.

APPLY APPLIQUE – Remove paper backing from applique. Pin applique to craft as instructed in Sewing Directions. A glue stick can be used to temporarily hold the applique in place before stitching. Fuse appliques in place, following manufacturer's directions.

STUFF - Pull fiberfill apart and fluff it before you use it. Break apart the lumps and thick spots. Use pieces about the size of a tennis ball. Pack into place using the end of a long handled wooden spoon or chop-stick. Pack firmly in place each time stuffing is added. Use both hands to mold and shape, being careful not to over stuff or make lopsided.

SIMPLY THE BEST TECHNIQUES FOR SEWING FLEECE

- Fleece fabric is strong, hard to puncture or tear and doesn't ravel or get pilly.

- Since cut edges of fleece fabrics do not ravel, inner edges of seams and hems can be left raw. When pinning pieces together, use long pins...the kind with bead heads are best because short pins tend to get lost in the fleece.

- When stitching, try using a narrow zig-zag stitch, adjusting the width and length for the type of fleece you are using. Always test first on some scraps and keep for reference.

- Sew slowly and carefully the first time you stitch a seam as stitches are hard to remove.

- When sewing around shaped areas sew slowly being careful not to stretch the fleece as you feed fabric through your machine.

- Finger press or steam press on a low temperature setting using a press cloth.

- Raw edges can also be cut with pinking shears.

PATTERN PIECES WILL BE IDENTIFIED BY NUMBERS THE FIRST TIME THEY ARE USED.
