

WANTED: DUCKLING SIGHTINGS

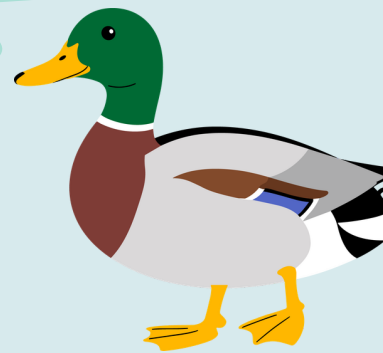

We want to hear about the mallard broods you see this year!

All you need to record is:

-  Location
-  Date
-  Number of ducklings
-  Approximate age

Report your brood sightings to DucklingWatch to help scientists understand what is causing changes in our mallard population

Reporting the **same brood more than once** is particularly useful - **name your brood** and record the **number of ducklings** each day you see them to help us learn about **duckling survival rates!**

Sightings from anywhere in Britain welcome!

Get involved!

Scan the QR code or visit citsci.org/projects/ducklingwatch to submit your sightings and for more information, including a guide to estimating duckling age
